

Preliminary Amendment  
Appln. No.: National Stage of PCT/JP2005/004102

**REMARKS**

The claims have been amended to remove multiple dependency.

The specification has been amended at pages 23, 36 and 56 to correct obvious, inadvertent errors. The basis for the amendment at pages 90 and 98 is that zinc powder does not appear in the foregoing descriptions. The grounds for the amendment at page 94 is the description at line 5 of the same page, namely, "a VdF polymer having acryloyl group (-OCOCH=CH<sub>2</sub>)". Reference to the "cross-cut test" at page 101 was deleted because no results of the test are shown.

No new matter has been added.

Respectfully submitted,

---
